The Allison Model 250, now known as the Rolls-Royce M250, (US military designations T63 and T703) is a highly successful turboshaft engine family, originally developed by the Allison Engine Company in the early 1960s. The Model 250 has been produced by Rolls-Royce since it acquired Allison in 1995.

Allison Model 250 - Wikipedia

The Allison 250 is the world's most successful small gas turbine engine. It was first produced in 1959, the design horsepower was 250 BHP. The engine was built at a time when most gas turbine manufacturers thought there would not be a market for such a small power plant and expected this role to be served by piston engines.

Allison 250 Gas Turbine | Louisiana National Guard Museums

In June 1958, Allison was awarded a contract by the Air Force (managing it for the Army) to design and develop the Model 250 (military designation T63) engine. Designed as both a turboshaft and turboprop, it was to be a simple, low-cost engine for several applications.

Get the best deals for allison 250 turbine at eBay.com. We have a great online selection at the lowest prices with Fast & Free shipping on many items!

allison 250 turbine for sale | eBay

The Allison 250-C18 is a 2-spool, reverse-flow, gas turbine engine with a 6-stage axial-flow, 1-stage centrifugal-flow, compressor section, and a 4-stage axial-flow turbine (2-stage gas producer, and 2-stage power turbine). The 250-C18 is rated at 317 shaft horsepower at 51,600 r.p.m., N1 (6,000 r.p.m. N2).

Allison 250-C18 Archives - This Day in Aviation

Allison 250 turbine engine cutaway. Here are a few videos of a C18 gas turbine engine I have recently completed sectioning and setting up to display. It is now being used as a pilot training aid by Becker Helicopters on the Sunshine Coast Qld Australia.

Allison 250 turbine engine cutaway. - PPRuNe Forums

Two-shaft modular design featuring a two-stage LP turbine, two-stage HP turbine, and a gearbox with 6,000rpm output. Compressed air is routed to the aft end of the engine for combustion, with exhaust gases exiting from the middle of the engine.

M250 turboshaft – Rolls-Royce

One of Allison's most successful projects is the Model 250 turboshaft/turboprop engine family, which was started by the company in the early 1960s, when helicopters started to be powered by turbine, rather than reciprocating, engines.
