Replace Artcam with TypeEdit | Type3
Raised Round Module: The ArtCAM Express Raised Round Module is ideal for foil and embossing dies with lettering as it generates engraving toolpaths directly from the vector artwork. Determining the optimum height and shape, this strategy enables you to create a tapered edge to the letter design so that there are no sharp edges that would otherwise pierce through the material.

The most important enhancement in ArtCAM Pro's machining is a new 3D offset strategy that gives a much better surface finish with harder materials. This will be especially useful when machining production tooling from ArtCAM designs, such as dies for greeting cards, and when engraving decorations created in ArtCAM into moulds for plastics.
