Water Based Dulux Trade Paint - What The Professionals Say

Water-Based: Water-based paints are often referred to as latex paint, but this is a bit of a misnomer since they rarely contain latex. Instead, most water-based paints today use acrylic polymers to provide the adhesion and lasting finish you want in your interior paint.

New water-based Armstead Trade Quick Dry Gloss and Satin are the smart choices when you need an affordable, fast drying, non-yellowing alternative to traditional solvent-based trim paints. You can use all your usual trim painting skills with Quick Dry Gloss and Satin, but here are a few expert tips to ensure you get a finish to be proud of.

Advice Water vs solvent based products | Dulux Trade Paint ...

Interior paint is formulated to be stain-resistant, cleanable and able to standup to the rigors of everyday living. Unlike exterior paints, interior paint is created with ingredients that take interior air quality into consideration. Exterior paints are formulated to handle outside weather, mildew, chipping and fading. Because of this, exterior paints can often contain chemicals and fungicides that are best kept outside.
