The Pythagorean Theorem relates to the three sides of a right triangle. It states that c2=a2+b2, C is the side that is opposite the right angle which is referred to as the hypotenuse. A and b are the sides that are adjacent to the right angle. The theorem Page 5/18

simply stated is: the sum of the areas of two small squares equals the area of the large one.

Worksheets to Practice Pythagorean Theorem Problems

The pythagorean theorem or pythagoras theorem is a formula relating the lengths of the three sides of a right triangle. As mentioned earlier if you know the size of the other two sides you will be able to find out the length of the third side of the right angle triangle. Round the answer to the nearest tenth.
